DETAILED ACTION

Response to Applicant's Election

1. Applicant's election with traverse of Species I, Fig. 1, which corresponds to claims 1-22 and 24-33 in the reply filed on 6/14/2004, is considered improper.

Upon a further review, Species I, Fig. 1, an encoder according to an embodiment of the invention, reads on claims 1-22 and 24, whereas Species II, Fig. 2, a decoder according to an embodiment of the invention, reads on claims 25-33.

Applicant's response is improper because the Applicant has chosen to elect the entire set of claims, thereby failed to indicate to the Examiner which of the claims 1-22 and 24-33 read on the elected figure of the disclosed species.

Furthermore, the Applicant makes a second attempt to provisionally elect with traverse claims 25-33 (see Applicant's REMARKS), based on the Examiner's last office action (implied on page 3, second and third paragraphs).

However, the Applicant's election of the claims 25-33 is also improper, since Applicant has already chosen the Species I, which reads on claims 1-22 and 24 as discussed above. The claims 25-33 belong to the Species II, Fig. 2, the decoder.

In summary, the Applicant has chosen initially a species for an encoder, but electing the entire set of claims, whether traversed or not, and subsequently elects claims 25-33, but the claims 25-33 (decoder) read on the Species II.

Hence, the Applicant's response to the election/restriction is deemed improper based on the Applicant's improper election.

Therefore, the Examiner can't properly respond to the Applicant's traversal, unless the Applicant elects a single disclosed species on the basis of the corresponding figures as discussed above, and to indicate to the Examiner which of the claims 1-22 and 24-33 properly read on the elected figure of the disclosed species as discussed in the last election/restriction office action.
